

Ankit Jha

New Delhi, India

☎ +91-8287175051 ✉ ankitjha.connect@gmail.com 🔗 LinkedIn 🐙 GitHub 🌐 Portfolio

Skills

Languages: TypeScript, JavaScript, SQL

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication

Databases: PostgreSQL, MongoDB, Prisma, Mongoose

Frontend: React, Tailwind CSS, ShadCN, Redux Toolkit

Cloud / Tools: AWS (EC2, S3), Docker (Basics), CI/CD Pipelines (Basics), Zod, Nginx, Git, Postman

Experience

Elcom Digital

Jun 2025 – Sep 2025

Software Development Associate Intern

- Built an **automated CRM auditing system** (Python, SQL, Pandas, Email Automation) that eliminated **3+ hours** of daily manual auditing and improved data consistency by **~ 30%**.
- Developed a **gamified EOD reporting platform** (React, Redux Toolkit, TypeScript, Node.js, MySQL) with a leaderboard system, increasing daily submission rates from **sporadic to near-consistent** across the team.
- Deployed full-stack system on **AWS EC2** with Nginx reverse proxy, supporting **concurrent access** for the entire organisation.

Projects

PrepEdge (Backend) 🔗 | **Live Demo** 🔗 TypeScript, Express, WebSockets, Prisma, PostgreSQL, Gemini AI, ElevenLabs

- Designed a **scalable backend** with REST APIs and a **WebSocket server for real-time voice interviews**, handling **concurrent sessions** with stable low-latency connections.
- Engineered a **real-time AI inference pipeline**: speech → ElevenLabs STT → Gemini evaluation → adaptive TTS response in **under 5s** end-to-end via async processing.
- Built an **AI resume screening system** (PDF parsing + candidate scoring) that reduced manual screening effort by **cutting unqualified submissions** before review.
- Structured as a **Turborepo monorepo** with a shared Prisma package for type-safe, modular API design across services.

QueryNest 🔗

React.js, Node.js, Express.js, LangChain, QdrantDB

- Built an **AI-powered RAG backend** to query PDFs and web pages via **vector search** and **LLM retrieval**, supporting documents up to 50+ pages with consistent accuracy.
- Designed full **LangChain pipeline** (parse → chunk → embed → search → retrieve) for end-to-end document ingestion and intelligent querying.
- Optimized **QdrantDB indexing** to reduce average query response time by **~ 35%** ensuring fast and reliable retrieval at scale.

Financial Data Processing Backend 🔗 | **Live** 🔗

TypeScript, Express.js, Prisma, PostgreSQL, Gemini AI, Docker

- Built a **production-deployed REST API** with **JWT auth**, RBAC (ADMIN/ANALYST/VIEWER), global rate limiting, and Zod validation serving **multiple concurrent roles** with zero auth bypasses.
- Integrated **Gemini AI assistant** (OpenAI-compatible SDK) converting natural language to SQL; reduced ad-hoc query turnaround from **minutes to seconds** for non-technical users.
- Designed analytics endpoints, **CSV export pipelines**, and full Swagger docs; used **Docker Compose** to containerise the PostgreSQL database for a reproducible local dev environment.

Education

ITS Engineering College, Greater Noida

Nov 2022 - May 2026

B.Tech in Computer Science & Engineering

CGPA: 8.15

Certifications

- AWS Academy Graduate - Cloud Foundations (AWS Training & Certification) 🔗
- Full Stack Web Development - Apna College 🔗
